# **Burmeister & Wain**

**Engineers and Shipbuilders**

**B**urmeister & Wain's history as engineers and shipbuilders covers more than a century. Since 1904, when B & W marketed its first stationary diesel engines, and especially since 1912, when it built the world's first ocean-going ship powered by direct reversible marine diesel engines, the company has occupied a leading position in the fields of diesel engineering and the building of all types of modern motor ships. In order to strengthen this position, Burmeister & Wain has in recent years extended all its manufacturing resources. The purpose of this brochure is to give you an up-to-date picture of the company's plants and their production.
